

Mehmed Emirhan Amaç

Computer Engineer

I am a 3rd year Computer Engineering student. While studying, I want to see the business life environment. Therefore, I believe that I can improve myself with internship or job opportunities in your company. If you want to review, I share my projects on my github account.

📍 ZEYTINBURNU, Türkiye

📅 10 January, 2001

EDUCATION

Computer Engineering Marmara University

2020 - Present

Istanbul-Turkey GPA: 3.36

Computer Engineering Kocaeli University

2019 - 2020

Inter-institutional transfer to
Marmara University

High School Samiha Ayverdi High School

2016 - 2019

Istanbul-Turkey

I Did..

Creating my own dataset and training several different models on it and understanding realtime direction with visual arrows (python keras),

Tic-tac-toe game in c language,

Student management system in Java language with frontend

Simple embedded projects with PIC16F877

Python script that splits long book texts into sentences and outputs the searched words in csv format

I can make..

Relational database design,

Connection between backend and database,

Presenting an algorithmic solution to a problem and efficiency analysis of the algorithm i wrote,

Synchronization between threads using semaphore and mutex,

Network topology design and connections

Parallel programming in Linux using C

SKILLS & TOOLS

Java

C

Python

MSSQL

PIC Programming

Cisco Paket Tracer

Arduino

Linux

Shell Programming

Github
